Full-Stack Developer and graduating Computer Science student specializing in modern web technologies and AI integrations. Skilled in TypeScript, Go, and SQL (PostgreSQL), with practical experience engineering custom RAG services using Express.js alongside modern frontends built in Next.js and React. Passionate about performant backend systems and intelligent API design.

TECHNICAL SKILLS

Languages & Frameworks:	TypeScript, Go (Golang), SQL, Next.js, React.js
Tools & Databases:	Git, GitHub, PostgreSQL
Methodologies & Soft Skills:	RAG Service Architecture, API Development, Data Management, Problem-Solving, Team Collaboration

PROJECTS

AI-Powered PDF-Based Examination Generator and Administration Using Retrieval-Augmented Generation (RAG) Algorithm

Role: Fullstack Developer

React.js, TypeScript Go (Gin), Node.js (Express.js), TypeScript PostgreSQL, Milvus, Ollama, RAG, Docker, Nginx

- Developed an AI-powered examination generator using RAG.
- Implemented document processing and vector-based retrieval.
- Integrated local LLMs for automated question generation.
- Developed examination administration, automated scoring, and student performance analytics.
- Built the frontend, backend APIs, and database integration.

EDUCATION

Bachelor of Science in Computer Science

Central Philippine University | *August 2022 - May, 2027*
